The Office of Federal Student Aid requires your parent(s) to report a value for their business and/or farm if they have more than 100 employees. On your verification worksheet, your parent(s) said they have more than 100 employees for their farm and/or business OR they said they did not have an amount on line 12 and/or 18 of their tax return and there is an amount. Please answer the following question to enable MMCC to complete the processing of your financial aid.

**Does your parent’s business and/or farm have more than 100 employees, including themselves and other family members?**

**YES** or **NO**

If the answer is **NO**, have a parent sign the form and return it to the financial aid office.

If the answer is **YES**, your parents must provide their Net Business and/or Farm Value $__________ **This is NOT the amount on their tax return.**

Net business and/or investment farm value includes the market value of land, buildings, machinery, equipment, inventory, etc. Business and/or investment farm debt means only those debts for which the business or investment farm was used as collateral.

An investment farm is a farming business that your parent(s) own but did not reside on nor materially operate. If the farm is part of their homestead, then include that in the explanation and report the farm value as $0.

If the value is $0, the Office of Federal Student Aid requires that your parent(s) explain why their business and/or investment farm asset value is $0. **Your parent(s) must enter a net business or farm value and provide a written explanation if the value is $0.**
