How to Change or Re-Set Your Password

1. From MidWeb’s main menu, select Password Maintenance. Please note that the Password Maintenance option is also available in any of the audience-specific MidWeb menus (Current Students, Faculty, etc.).

2. You will be re-directed to the MMCC Password Change System. The password change system requires that you have your MidWeb user name, birth date, and MMCC ID Number on hand. Please check the tutorials for further details on finding your MidWeb user name and check your Student ID card or paperwork from MMCC for your ID Number.

3. Follow each step and click on the question mark if you need more assistance with each step.

4. Once you have successfully re-set your password, you will need to close the screen for security and re-open MidWeb in another browser window.
